H. BAER, M. D.
ELSINORE, CAL.

December 30, 1922.

Professor Philip A. Munz,
Claremont, California.

Dear Prof. Munz:

Professor Needham was in to see me today, and says that he expects to make frequent trips over here during the winter. I offered him the use of my house if he should care to come up and do some work during the week-ends, and he said that he would be glad to take advantage of it, and would try to induce you to come over with him. I hope that you will come over with him, as I should be glad to go out with you to some of the surrounding cañons.

In case this plan should not work out, if you would let me know in advance, you might come over to Riverside on the Pacific Electric, an hour's ride from Claremont, and I would be glad to drive over and bring you back here, also taking you back to Riverside when you were ready to leave for home.

If you could come up to Riverside, for example on Friday afternoon, it would give you all of Saturday and the greater part of Sunday here, as you could take a late Sunday afternoon car at Riverside and be home by dark.

Hoping to see you some time, I am,

Very truly yours,

H Baer
